

MIESP01

Designed by Mies van der Rohe, one of the pioneers of modernist architecture, this pull handle shows his objective approach, coupled with his desire to express the spirit of the modern era. Izé has designed this handle to work with the MIESL01 lever handle. That is the handle that Mies designed for the unbuilt tower in Mansion House Square in London. The detailed designs were unearthed and exhibited at the start of 2018, thanks to the researches of architect and writer Jack Self. Like all izé luxury door hardware, the lever handle is available in the full range of izé materials.

Length : 400 mm

Width : 25 mm

Projection : 60 mm

Finish : Available in all izé finishes
