

flamingo bathroom turn by Make Architects

izé

MKT02

Architect-designed luxury bathroom turn
London-based architect Make collaborated with izé on designing ironmongery for its project at 55 Baker Street, London. The Flamingo hardware picked up on the micro-scale the faceted glazed insertion to create a new lobby and atrium that the architect used to give a new life to the building. The bathroom turn follows the design of the rest of the Flamingo range, which reflects and refracts the angular planes of the architecture. Like all izé luxury door hardware, the escutcheon is available in the full range of izé materials.

Length : 68 mm

Projection : 50 mm

Finish : Available in all izé finishes
